Overview

WhatsApp Status is a temporary 24-hour sharing feature that offers a quick and easy way to share daily moments or updates with selected contacts. It is for both personal and business users.

On WhatsApp, you can update your status in the following formats:

- Text
- Photo
- Video
- Voice Note

Prerequisites

- An active WhatsApp account
- A stable internet connection
- An internet browser

Update Status from Mobile

WhatsApp lets you create a status on a mobile device. You can update the status in the following formats:

- Text
- Photo
- Video
- Voice Note
- AI Image

Add Text Only Status

WhatsApp enables you to share short messages, announcements, or updates using text-based status posts.

Prerequisites

- Have an active WhatsApp account
- Ensure a stable internet connection
- Limit text content to 700 characters

To add,

1. On **WhatsApp**, tap **Updates**.
2. On the **Updates** screen, tap .
3. On the **Add Status** screen, tap **Text**.
4. On the text status editor, type text and tap .

Note: You can also customize the text status. For more information, refer to .

Customizing Options for Text Status

WhatsApp lets you customize your text status to improve the appearance of the message without images.

Where to Access the Option?

You can access customization tools from the text status editor screen.

Available Options from Mobile

Customization Option	Description
Aa	Allows you to cycle through a variety of available font styles for your text.
	Allows you to apply different colours to your status box.

The text status is visible to selected contacts for 24 hours.

Add Photo Status

WhatsApp enables you to share images as a status update. You can either capture a photo using your device's camera or select a photo from the gallery.

Prerequisites

- Have an active WhatsApp account
- Enable camera permission on mobile
- Ensure a stable internet connection

To add,

1. On WhatsApp, tap **Updates**.
2. On the **Updates** screen, tap .
3. On the **Add Status** screen, perform one of the following:
 - Update an existing photo from the gallery
 - a. From the bottom navigation bar, select **Photo**.
 - b. From the gallery, select the desired photo.

Note: You can customize your photo as well. For more information, refer to .

Customizing Options for Photo Status

WhatsApp provides multiple editing tools that let you customize a photo before sharing it as a status. These tools help enhance the image by adding text, emojis, stickers, and other visual elements.

Where to Access the Option?

You can access customization tools from the top of the photo status editor screen.

Available Options on Mobile

Customizing Option	Description
	Allows you to add music to your photo.
Aa	Allows you to add text to your photo.
	Allows you to add emojis and stickers.
	Allows you to crop or rotate the photo.
